Report of the Management Board

In the second quarter of 2016, Norvik Banka continued implementation of a targeted and balanced development strategy. The bank's asset amount was EUR 911.4 million, loan portfolio – EUR 241.7 million, deposit portfolio – EUR 757.1 million. The Bank's capital adequacy ratio in the reporting period was 16.45%, while the liquidity ratio as of 30 June 2016 was 62.27%.

In the second quarter of 2016, under the VISA company reorganisation process, the Bank received compensation for alienation of the Bank's VISA Europe Ltd shares, in particular, money compensation in the amount of EUR 7.7. million and VISA Inc preferred shares in the value of EUR 3.0 million. The total income from the transaction amounted to EUR 10.7 million, thus the Bank's profit as of the end of the second quarter reached EUR EUR 10.9 million.

Norvik Banka

Bank's strategy and targets

The Bank has set itself the target of becoming a leading, successful universal bank with an extensive service network in Latvia.

The Bank Group aims to become an international financial services provider, offering customers highquality financial products and asset management services in the European Union and across Eastern Europe.

Our vision focuses on our customers' needs, creating long-term value for the bank's customers, employees, shareholders and community.

We are aiming:

- To create a successful and stable universal bank in Latvia, meeting customer needs, and following the regulators framework for success;
- For a high-level of corporate governance to ensure well-controlled, profitable future growth and effective management of the current Non-Core assets;
- To expand the Bank's direct financial services internationally, specifically in the European Union and across Eastern Europe.

Focus on niche markets:

- Latvian residents retail customers middle-class- multi-retail-product-in-the-wallet;
- Latvian corporate clients well collateralized loans & low-cost deposits;
- Foreign customers fee-based income products, trade finance.

Our strategic goals are based on the following core values:

- Innovation The use of modern information technology through all our services and leading the financial services market in technology;
- Culture A highly developed corporate culture based on multi national corporate standards;
- Loyalty Promotion of higher levels of customer loyalty though the offering of significant discounts on our services to market levels to ensure customer transition from the wellentrenched banks;
- Expansion The further development of a network of 'branches' throughout Latvia market to expand the number customers served;
- Financial Management Focus on resource planning and management of financial resources, including the optimization of liquid assets'.

Other main building-blocks of the Bank's strategy:

- To combine the knowledge, and experience of local experts and international experience across a variety of markets;
- To provide end-to-end servicing of the full customer range, with customer service driving all product propositions, and hi-technology driving efficiencies;
- To adhere to a prudent investment and lending policy, to maintain stability and appropriate risk-income appetite.
- To maintain a stable income stream so that the Bank is in a position to manage any further
 downside economic scenarios, without a decrease in capital adequacy ratios, without a loss
 in customer service levels, and with options that other banks on the market may not have
 available to them given the European Union geography and diversified customer base.

Norvik Banka

Risk analysis

Management of financial risks, the most significant of which are: liquidity risk, credit risk and market risk is being effected in accordance with the Financial risks management policy approved by the Board and the Council of the Bank, as well as with other normative documents that comprise the Bank's risk management system.

Liquidity risk includes the risk of the untimely settlement of customer and other legal creditor claims. Liquidity risk management and control is based on asset and liability term analysis, internal limit regulations regarding the net liquidity position, the effective usage of liquidity's I reserve funds and liability regulation for the remaining free resources. The Resource management division constantly manages liquidity's I reserve funds (cash, fund balances with correspondent bank accounts, short-term inter-banking transactions), in order to always have sufficient funds for fulfilment of current short-term commitments. The Board and the Assets and liabilities committee state general liquidity risk management criteria by regulating the volume, terms and directions of the Bank's activities. During the II quarter 2016 the Bank's liquidity ratio was 58-63 %.

Credit risk is the risk of untimely or incomplete fulfilment of debtor liabilities. The credit risk management system includes approval of methods for evaluation of credit risks of partners, borrowers and issuers, setting of limits for types, volumes, and maturities of lending and investment into securities of the Bank's portfolio, regular assessment of assets and off-balance sheet liabilities. The Bank makes special provisions for doubtful debts, calculated as a difference between future discounted cash flows from returnable assets and the balance sheet value of those assets. The provisioning for unsecured consumer loans is made based on repayments statistics. As of 30 June 2016 the amount of special provisions was 42 943 thousand EUR or 17.49 % of the total loan portfolio. Capital adequacy ratio on 30 June 2016, adjusted for special provisions, was 16.45 %. The Bank's Board and the Credit Committee ensure credit risk management and the Risk Management Division constantly supervises over efficient performance of internal control of credit risk management.

Market risk is the risk of incurring losses by the Bank as a result of unfavourable changes in the market interest rates, exchange rates and prices of trade portfolio securities. By analyzing differences in the maturity and adjustment of interest rates of assets and liabilities, as well as the net interest margin and yield in relation to currencies and areas of business, the Board and the Assets and Liabilities Committee set the basic interest rates for deposits and loans for each currency group and period.

This foreign *currency risk* management is based on meeting the restrictions of the net open position of each foreign currency and the total amount of the net open positions of foreign currencies, in compliance with the requirements of the Financial and Capital Market Commission. In order to avoid losses arising from adverse changes in rates, the Capital market Department constantly supervises over the total amount of the open foreign exchange position, and the Risk Management Division controls the compliance with the restrictions of foreign currency positions. To manage the position, the Bank widely uses derivatives, such as forward transactions (conclusion of a deal at certain rates on a certain future date) and SWAP (sale of earlier purchased volume of currency on a certain date).

Operational risk is the risk of incurring losses as a result of inadequate or improper performance of internal processes, inappropriate actions of personnel or systems, or as a result of external circumstances. Operational risk management is based on well-established procedures describing all the operating processes, proper segregation of fulfilment and control functions, regular audit by the Internal Audit Service; all the events of operational risk occurrence (employees' mistakes, failures in the IT systems, etc.) are registered in the database and analyzed in order to improve operating processes and enhance internal control system.
